"I no longer see the world the same: when I see numbers, I see the faces of those who make up the statistics, and I am no longer able to live with what I see without doing something.

Stories moved me, but data changed me."

- EM2030 Global Advocates Survey respondent

Introduction to Equal Measures 2030

WHO WE ARE

Equal Measures 2030 is an independent civil society and private sector-led partnership that connects data and evidence with advocacy and action to fuel progress towards gender equality.

Part of our work is ensuring girls' and women's movements, advocates and decision makers have easy-to-use data and evidence to guide efforts to reach the SDGs by 2030.

HOW WE WORK

DATA AND ANALYSIS

track progress towards the SDGs for girls and women

NATIONAL INFLUENCING

equip girls' & women's organisations with data and evidence-based tools to power their advocacy

GLOBAL/REGIONAL INFLUENCING

use our collective voice and create data tools to influence the policy agendas of governments to achieve the SDGs for girls and women

THE IMPORTANCE OF DATA FOR GENDER EQUALITY

When advocates and decision makers have the evidence they need we can better ensure girls' and women's rights become and remain a priority on the development and policy agenda and in pursuit of the SDGs.

Purpose of this collaboration

- 1. To celebrate and strengthen linkages between data producers, users and communicators
- 2. To make data more accessible for gender equality advocates
- 3. To work with the talented and passionate data community to #VisualizeEquality

About the data

The EM2030 Global Advocates Survey 2018 attracted responses from 613 gender advocates around the world who shared their views on:

- 1. progress towards gender equality
- 2. how they feel about current data sources
- 3. and the issues they think should be prioritized in the push for better and more accessible data to meet the SDGs for girls and women.

Collaboration Details

- Data and viz will be released on Sunday, 23rd September
- When posting on Twitter, please include #VisualizeEquality and tag @Equal2030
- Post your viz on data.world and Twitter as usual
- Selected vizzes will be displayed during EM2030's UNGA side-event on September 24th at 12.30pm EST
- Viz Review will be on September 26th at 4pm BST

Join us!

We look forward to seeing your visualizations
